RESEARCH SUMMARY

PhD in computational linguistics with 3 years of applied research experience.

Nine peer-reviewed publications in ACL, EMNLP and NAACL.

EXPERIENCE

Research Scientist, Lion City AI Lab

2023 - Present

- Research on parameter-efficient fine-tuning of large language models.
- Published three first-author papers on low-resource machine translation.
- Prototype implementations in PyTorch and HuggingFace Transformers.
- Collaborated with engineering to hand off one model to production.

Research Assistant, National University of Singapore

2019 - 2023

- Doctoral research on syntactic parsing for low-resource languages.
- Built and released two annotated corpora used by the wider community.

EDUCATION

Ph.D. in Computational Linguistics, National University of Singapore, 2023

B.A. in Linguistics, Peking University, 2018

SKILLS

Python, PyTorch, Transformers, HuggingFace, NLP, deep learning, machine learning, LaTeX, Git, Linux, statistics, some SQL
